

Service Notice

Number: 1TB-00007
Rev. 0
Date: 10/18/2017

Name of Notice:
Navigator GPS Control Unit - Obsolescence Notice

Population of Affected Devices:
Lead-Acid Battery Navigator GPS Control Unit, part # GP-2800-00

The reason for the obsolescence of this product:
The obsolescence of the Lead-Acid Battery and Main Control Board.

End date for support and service of the Navigator GPS Control Unit: October 31, 2018

The replacement part for this product:
- Navigator 2.0 Control Unit Upgrade, part # N2-9800-UG
OR
- Navigator 2.0 Wireless System, part # N2-9000-00

Promotional Trade-in Upgrade: October 9, 2017 – December 31, 2017.

While we plan to continue supporting the GPS system until the above stated date, as of November 20, 2017, we are required to increase the repair price for several critical components of the GPS system. As new battery technology continues to improve, demand and availability for the old Lead-Acid battery has declined. In addition, replacement components for the GPS control unit are becoming harder to obtain from third party vendors and several of them have become obsolete and/or have extended lead time. For a limited time until December 31, 2017, Dilon will offer unprecedented trade-in value on your older Navigator GPS control unit(s). We recommend that you take advantage of our promotional offer. The price of the Navigator 2.0 control is expected to increase on January 1, 2018.

The Navigator 2.0 control unit uses a state-of-the-art lithium ion battery with a much longer life than the GPS lead-acid battery. The Navigator 2.0 upgrade includes a multi-bay charging station, can be used with the new wireless Pilot probe, and is fully compatible with all existing Navigator cables and probes. The Navigator 2.0 can also be mounted on a roll stand for easy transportation in the Operating Room.

To see how Dilon can work with you to cost-effectively replace your aging Navigator GPS please feel free to contact your local Navigator representative immediately.

Thank you for your continued support and confidence in Dilon Technologies. We value you as a customer and appreciate the opportunity to support you and your surgical needs.
